

Keysight EDA Tool Suite

Keysight/Cliosoft Design Data (SOS) and IP Management (HUB)

PathWave Advanced Design System (ADS)

- Industry-leading RF, microwave, signal integrity, power integrity design platform
- Allows designers to perform EM and circuit co-simulation in one single tool
- Schematic, layout, circuit, electro-thermal co-simulation and three full-wave 3D EM technologies with integrated circuit (IC), package, laminate, PCB, and 3D EM component co-design

Applications

- RF and Microwave Circuits
- Radar Design
- Power Electronics and High-Speed Digital
- Electromagnetics

A Platform for Multi-Technology Assembly and RF Simulation

PATHWAVE ADS

Models, Design Kits
Libraries, Database Management

Package AND IC Layout

PathWave Design System (ADS) At-A-Glance

INTEGRATION

- **Traceability:** Able to read in many formats, including OA
- **Verification:** Layout-vs-Layout
- **In-platform layout tool** spans technology (IC-Module-PCB)
- Complex Multi-library **workspace management** tools built into platform

ASSEMBLY

- **Smart Mount** Multi-Technology Assembly is as easy as placing an instance
- **Physical Verification** across technology boundaries
- **Design Rule Checking** on 3D Structures, with constraints manager

SIMULATION

- Fast, accurate **Harmonic Balance**
- **RFPPro** for easy, user-friendly **EM**
- **Electrothermal** solver, floor planner
- **Envelope** simulation for modulated signal analysis (compact signals & Fast Envelope)
- Find **stability** problems with WS-Probe
- Unlock data and insights from simulation with **Data Display, Python**

How Does ADS Work with EM Simulations?

EM-Circuit Simulation - What we heard over 10 years

Integrated EM-Circuit Co-Simulation in ADS

RFPPro Makes EM Accessible to Circuit Designers

Simplifies EM setup and analysis for complex ICs and packages

Key Benefits

- **Instant EM access** during design with a single integration into the main IC platforms
- **Automatic EM expert settings** guarantee confidence in EM results for novice and expert users
- Fast & correct analysis setup, regardless of problem size for quick, interactive EM and **EM-circuit co-simulation** on demand
- Enhanced ADS Momentum and FEM simulator performance

In Summary

In Summary – Simplifying the Design Cycle with ADS and RFPro

Advanced Design System (ADS)

- Industry-leading RF and microwave design platform
- Works with devices at the integrated circuit (IC), module, or PCB level
- Can work with devices at the circuit/schematic level or at the physical/layout level
- Powerful simulation technologies, including S-parameters, harmonic balance, thermal, and EM

RFPro

- Brings full 3D EM simulations to every circuit designer, no expert setup required
- Full 3D EM engines, containing the same environment for Momentum and FEM
- No need to ‘cookie cut’ – you don’t need to remove active devices or SMD components and replace with pins
- No exporting – integrated into the design environment
